Professor E. S. Allen
427 Hawthorne Avenue
Ames, Iowa 50012

Dear Professor Allen:

With reference to the abstract of your paper "Quasi-Algebraic Functions", I quote the following excerpt: "If x is real and positive and $\{x^n\}$ is the sum of powers of positive terms, $x^n + (x-1)^n + (x-2)^n + \dots$, it is a quasi-algebraic function. If, in this function, $[x]$ is replaced by x ". Should this not read, "If, in this function, x is replaced by $[x]$"?

Your reply by return will oblige.

Sincerely yours,

Raoul Hailpern,
Associate Secretary
