

ABSTRACT

The abstract should be in the form of a brief and concise statement of the main results or points of view of the paper, without demonstrations and with a minimum of formulae. It should not exceed 100 words and should be compressed if possible into a single paragraph. It should be written in the third person. The abstract should be typewritten and in a form suitable for immediate publication in the MONTHLY.

It was asked whether or not we, as teachers of mathematics, are only concerned about handing out a certain collection of facts which we require our students to know. The discussion emphasized the importance of training our students to think abstractly and logically. Perhaps this means covering less material in a given course, but covering it more carefully.

MATHEMATICAL ASSOCIATION OF AMERICA, INC.
ABSTRACT OF PAPER

Title of Paper: Can we only concerned

about converging information?

Time.....minutes.

Name of Author: Ronald V. Mayers

Institution: Central College

Address: Pella, Iowa

Member of Mathematical Association
of America: Yes No
