

December 9, 1968

Dear Colleague

It is time to be thinking of the program for the Iowa Section meeting of the Mathematical Association of America at the University of Northern Iowa, Cedar Falls, April 18, 1969, in conjunction with the Iowa Academy of Science meeting.

It has been suggested by the Chairman of the section, John C. Friedell, that the program this year should concentrate on teaching techniques and teaching notes which are of interest to college teachers. Notes similar to those in the Monthly would be appropriate. Innovations in either presentation or curricula are especially invited. Those of you who have items to present should contact the Chairman at Loras College, Dubuque, Iowa, 52001. Early word to him will be helpful in planning the program.

If you have a suggestion for a possible guest speaker, will you please inform Prof. Friedell as soon as possible, since this feature of the program needs early attention.

A report of the activities of the committee on Articulation with two-year colleges will be a part of the program.

I will be happy to send membership application blanks to anyone you might suggest to me as a possible member of the Iowa Section of the Mathematical Association of America.

Your early attention to the matters of the spring program will be appreciated.

Sincerely,

B. E. Gillam  
Secretary-Treasurer, Iowa Section  
Mathematical Association of America
