Professor Tim Robertson
Department of Statistics
The University of Iowa
Iowa City, Iowa 52240

Dear Professor Robertson:

I have received a copy of your letter of September 21st to Professor Alder, asking whether I might be able to speak at your Sectional Meeting in Dubuque on Friday, April 23, 1971. I shall be glad to do so. I wonder whether the title, "Shapes of the Future", would be acceptable for my lecture. Under this title I would discuss some selection of unsolved but easy-sounding geometric problems. If it seemed appropriate to you, I would like to discuss problems which come from various areas of science--solid state physics, botany, organic chemistry, etc.

So far as I have been able to learn from my local travel agency, the only way of flying to Dubuque is from Chicago. However, I like to avoid the O'Hare Airport whenever possible, so I should greatly appreciate your checking for me on railroad connections from Minneapolis to Dubuque. I shall attempt to make this check locally as well, but locally obtained information concerning rail transportation in other parts of the country has often been inaccurate in my experience, so I really appreciate your checking on this for me.

Yours sincerely,

Victor Klee
