## TO THE STUDENT

Many students who are interested in mathematics find membership in the Mathematical Association of America (MAA) especially rewarding. The MAA is the one national society devoted exclusively to the interests of collegiate mathematics. Its journals offer you a wealth of mathematical stimulation.

The AMERICAN MATHEMATICAL MONTHLY is the official journal of the MAA and every member receives a subscription. It contains some of the best expository articles on mathematics being published today, classroom notes, challenging elementary and advanced problems (with solutions contributed by readers), book reviews, news and notices and other features.

MATHEMATICS MAGAZINE contains similar features pitched at a slightly lower level of mathematical experience. A subscription to MATHEMATICS MAGAZINE can be purchased independently of membership in the MAA, but members may subscribe at a special reduced rate.

In addition, members of the MAA may purchase copies of monographs published by the Association at special prices, usually 50% below list prices.

If you are interested either in joining the MAA or in subscribing to MATHEMATICS MAGAZINE, please print clearly your name and address below or on the back of this page. You will be sent descriptive materials and membership and subscription forms directly from the Washington Office of the MAA.
