Re: Grant to support pilot programs for graduate students at section meeting

Enclosed please find a check for \$400 to support your section's proposal to the Committee on Graduate Students to support pilot projects during calendar year 2004.

Please recall that, within a month of the Section's meeting, the Section is required to file a short report describing:

- the level of participation in the program by graduate students;
- short-term evaluation of their results;
- recommendations based on their experiences; and
- how funds were spent, as well as ideas/plans for future efforts to include graduate students.

We appreciate your efforts in support of this program and look forward to working with you as we reach out to graduate students, our members of the future.
