

Committee on the Exchange of Information on Mathematics

Public Information Panel

Each Section has been asked to designate a public information representative.

The responsibilities of that position follow:

- (1) To be in contact with news media in the Section boundaries -- TV, radio, newspapers and local magazines (if any) -- so that information or news releases provided to the representatives from the national office can be quickly channelled;
- (2) To provide information to local media and college public relations officers about Sectional meetings and individuals in the Section who are involved in National Meetings;
- (3) To send items to the newly-established MAA Newsletter, FOCUS.

The representative would be the primary contact in the Section for receiving newsworthy information from members of the Section and sending that information to the Chairman of CEIM for consideration by the editor of FOCUS.
