

Discover Maplesoft's Mathematics Suite

Maplesoft's Math Suite is a family of math software products that make it extremely easy to explore, visualize, and solve mathematical problems from high school all the way through to graduate studies. Each product provides access to the world's most powerful mathematics engine through easy-to-use interfaces that are designed to meet the needs of students at different stages of their education.

Join us to explore all three products in Maplesoft's Math Suite, so you can see for yourself how these technologies can engage, motivate, and enlighten your students.

You will discover how:

- **Maple**, the powerhouse of the suite, combines interactive and programming features to provide the most powerful and comprehensive environment for exploring, visualizing, and solving even the most difficult math problems.
- **Maple Learn**, with its focus on learning and teaching, provides a one-stop online destination for exploring concepts, solving problems, and creating rich, online math content.
- **Maple Calculator**, the free mobile app, lets students solve problems, check homework, and explore graphs on their phone, as well as making it easy to enter problems in Maple and Maple Learn by simply taking a picture.

Get a free interactive sample lesson, based on your own material!

With enlightening visualizations, instant feedback, motivating examples, self-serve content, hands-on explorations, and much more, the Maplesoft Mathematics Suite helps you:

- **Engage students** who are easily bored or distracted
- **Motivate students** who don't see the point
- Overcome **math anxiety**
- Instill **true understanding** in students who are just going through the motions
- Provide sufficient opportunities for **practice**
- **Evaluate progress** in a world where it's easy to look up answers
- Deal with varying levels of **readiness** for the course material

See for yourself how the Maplesoft Mathematics Suite can help!

Send us a sample lesson, example, or homework exercise from one of your classes, and we will bring it to life using the Maplesoft Mathematics Suite.
