

February 12, 1985

Professor Rebekka Struik
Campus Box 426
Department of Mathematics
University of Colorado, Boulder
Boulder, Colorado 80309

Dear Rebekka:

Thank you for your letter of February 7, and your kind invitation to lecture at Boulder. Unfortunately I am involved in a number of off-campus activities this spring and cannot extend the time of my visit to Casper. I would enjoy being in Boulder again. We spent a part of the summer of 1968 there. My husband gave lectures at a conference on differential equations. I have made reservations for Casper. I will leave O'Hare at 6:50 a.m. on Friday morning, arriving in Denver at 8:16 a.m., will leave Denver at 8:44 a.m. and arrive in Casper at 9:34 on Frontier Airlines. I plan to return on United Airlines leaving Casper at 2:30 p.m. on Saturday, getting back to O'Hare at 7:13 Saturday night. I am delighted to give a talk on women mathematicians, Grace Chisholm Young and Emmy Noether, Friday night and the talk on topology/material science on Saturday morning. I would also like an opportunity to talk with the officers of the section as to how the national organization might be more useful to the section--one of the goals for a visit of a national officer to a sectional meeting.

Given the number of skiers who fly west, I suspect it is good to have these reservations made. I look forward to hearing more details of the meeting from someone prior to March 15.

Sincerely,

Lida K. Barrett
Associate Provost
