December 2, 1986

Bill Emerson
Department of Mathematical Sciences
Metropolitan State College

Dear Bill,

As editor of the Rocky Mountain Section Newsletter I wonder if you would be willing to include an announcement about the CU-Denver applied math Ph.D program. Something along the following lines would be good.

> The Mathematics Department of the University of Colorado at Denver has been given approval to offer a Ph.D program in applied mathematics. The department offers courses and research opportunities in computational mathematics, operations research, applied statistics and discrete mathematics. The Ph.D program is another step in establishing Denver as a center for applied and computational mathematics in the Rocky Mountain region.

Thank for your help.

My best always,

Bill Briggs

Bill Briggs, Assistant Professor
Department of Mathematics
