

MidSchoolMath

National Conference 2015

Santa Fe, NM | February 26-28, 2015 | midschoolmath.com

Call for Presenters

Stop the Drop: The Return! Share your expertise and inspire others.

The team is back! Scott Laidlaw, Gladys Graham and Kevin Simpson, along with special guest, Dan Meyer, are preparing to host the Second Annual **MidSchoolMath National Conference** in Santa Fe, NM on February 27 - 28, 2015, with a special pre-conference workshop on February 26. Registration will open in October. Watch for updates, and check out highlights from the 2014 inaugural conference, at www.midschoolmath.com.

This year's theme is an extension of last year: Stop the Drop – The Return! It is all about showcasing the work that you and other educators have done to change how math is taught, focusing in on innovative lessons that can inspire the mathematician within each and every one of our students.

Share your best lessons, your most interesting and sharpest protocols and the activities you've developed to show students the rich and robust connections between classroom math and "real world" math.

Please join us in creating the most dynamic and meaningful professional development experience for middle school math professionals in the nation. Together, we can transform the math classroom – submit your proposal today!

Proposals will be reviewed in batches, until the conference program is at capacity. Apply early to increase the likelihood of acceptance. All accepted presenters/co-presenters would be eligible for a special discounted registration rate of \$350. Individuals and teams may submit multiple proposed sessions; please complete a separate proposal form for each session.

Proposal Review Periods: Batch 1: Submit by 9.17.2014 | Batch 2: Submit by 10.1.2014 | Batch 3: Submit by 10.15.2014
